

Metal stamping. Deep drawing. Structural sub-assemblies.

Founded in 2009, Dongguan Zofvan Hardware Products Co., Ltd. supplies custom metal components for OEM assemblies. Our core experience is in home and climate appliances; AI hardware and new energy are development focuses.

2 production bases

Dongguan and Jiujiang

10,000 m²

4,000 m² + 6,000 m²

100+ team

Toolmakers and manufacturing specialists

Manufacturing capability

Mechanical stamping	25T-250T 50+ presses	Blanking, piercing, bending and embossing
Hydraulic deep drawing	250T-350T presses	Housings, drawn covers and formed parts
Tooling	In-house design and maintenance	Die manufacture, milling and grinding
Secondary operations	24 processing stations	Tapping, spot/projection welding and clinching

Materials and quality

Cold-rolled steel (SPCC), galvanized steel (SECC/SGCC), stainless steel (SUS304/430), brass and aluminum. Material grade and thickness are reviewed for each drawing.

Quality workflow: incoming material inspection, first-article inspection (FAI), and in-process burr and dimensional control against approved specifications.

Prepare your drawing package

Send a drawing or 3D model, material and thickness, quantity, critical dimensions, finish, assembly requirements and delivery destination. Process feasibility, tolerances, tooling, MOQ and lead time are confirmed in the quotation.
